## Philips BlueVision

**Philips BlueVision**, the stylish looks of brilliant white daylight

**Philips BlueVision** Automotive Lighting creates active safety technologies that are designed to illuminate your car, secure your road, and enlighten your world. Interweaving technical innovation with a genuine concern for the safety and driving comfort of those drivers who benefit from their products, **Philips BlueVision** lamps bring the driving benefits (and stylish looks) of brilliant white daylight to all cars equipped with Halogen lamps.

**Philips BlueVision** lamps offer:

- A longer lasting blue light.
- Drivers would love to drive in daylight 24 hours a day, **Philips BlueVision** gives off a daylight effect to help you achieve this.
- The whitest light (“brilliant white daylight”) at (up to) 4000° Kelvin.
- The brilliant white daylight produced by BlueVision lamps enhances road sign and road marking reflection.
- The task of driving at night suddenly becomes a pleasure as drivers are less tired and able to better anticipate all driving challenges.
- The same high quality and excellent beam performance found throughout the entire range of Philips Automotive lamps.
- **Philips BlueVision** turns night into day and gives your car a high-end look.
- Active safety stylish looks of brilliant white daylight at up to 4000° Kelvin.
